SUMMARY

Data Engineer with 4+ years of experience delivering end-to-end data integration and migration solutions across cloud and on-prem environments. Strong expertise in ETL/ELT development using Informatica, DataStage, and modern cloud platforms including Google Cloud Platform (BigQuery, Cloud Storage, Looker). Proven ability to design scalable data pipelines, implement data quality frameworks, optimize SQL workloads, and partner with business stakeholders to deliver analytics-ready datasets. Google Cloud Certified Professional Data Engineer.

PROFESSIONAL EXPERIENCE

Data Engineer – UPS (via TCS) | Parsippany, NJ | Mar 2024 – Present

• Lead end-to-end delivery of large-scale data migration projects using ETL/ELT frameworks on Google Cloud Platform.

• Design and build scalable data pipelines to ingest, transform, and load data into BigQuery and enterprise data warehouses.

• Partner with business teams to define data mappings and transformation rules for complex financial and operational datasets.

• Normalize and model relational datasets across RAW, STAGE, and TARGET layers to support analytics and reporting.

• Develop data cleansing, filtering, aggregation, and enrichment processes to ensure high data accuracy.

• Implement automated validation checks and data quality controls across ingestion pipelines.

• Build and optimize complex SQL procedures, functions, and transformations in BigQuery.

• Apply performance tuning techniques such as partitioning, clustering, indexing, and query optimization.

• Process data from 190+ source systems and deliver secure outputs to downstream applications.

• Develop monitoring frameworks to proactively detect pipeline failures and data anomalies.

• Create Power BI dashboards and Excel-based reports for finance and logistics stakeholders.

• Perform root cause analysis and resolve data discrepancies across systems.

• Maintain detailed documentation for pipelines, data models, and architecture.

Student Developer – Cloud & Data | Northern Arizona University | Sep 2022 – Dec 2023

• Designed end-to-end ETL pipelines using Spark, Hive, Apache Beam, and GCP DataProc.

• Built data integration workflows to extract data from APIs, databases(PostgreSQL), and flat files.

• Developed data transformation logic and normalization rules for academic research datasets.

• Created automated validation scripts to ensure data completeness and accuracy.

• Built REST APIs using Python Flask to automate data access.

• Developed dashboards using BigQuery and visualization tools for faculty teams.

• Optimized SQL queries for large datasets improving performance by 30%.

• Participated in Agile development, sprint planning, and peer code reviews.

• Documented data pipelines, schemas, and transformation logic.

Systems Engineer – Infosys | Hyderabad, India | Sep 2021 – Jul 2022

• Developed enterprise ETL pipelines using Informatica, AWS Glue, Airflow, JavaScript and Python.

• Built data integration solutions across Redshift, BigQuery, and Oracle systems.

• Designed data mappings and transformation rules for client migration projects.

• Implemented data quality checks and reconciliation processes.

• Optimized SQL procedures and batch jobs for large-scale datasets.

• Supported production deployments and resolved data pipeline failures.

• Automated infrastructure using Terraform and shell scripts.

• Collaborated with cross-functional teams for requirements gathering and delivery.

TECHNICAL SKILLS

• Languages: Python, SQL, PL/SQL, Java

• Cloud: GCP (BigQuery, Cloud Storage, Looker, Cloud Run), AWS (Redshift, Glue)

• ETL Tools: Informatica, DataStage, Airflow

• Data Engineering: Data Warehousing, Data Modeling, ELT/ETL, Migration

• Visualization: Power BI, Looker, Excel, Crystal Reports

• Databases: Oracle, MySQL, PostgreSQL

• DevOps: Terraform, Docker, Git, CI/CD, Jenkins, Bitbucket

EDUCATION

M.S. in Computer Science – Northern Arizona University | 2023

B.Tech in Computer Science – JNTU Hyderabad | 2021

CERTIFICATIONS

• Google Cloud Certified – Professional Data Engineer

• Infosys Certified Agile Developer
